Draft Cruise Ship Discharge Assessment Report

U.S. Environmental Protection Agency

Oceans and Coastal Protection Division
Office of Wetlands, Oceans, and Watersheds

Office of Water
1200 Pennsylvania Avenue, NW
Washington, D.C. 20460

December 2007

ACKNOWLEDGMENTS AND DISCLAIMER

Today's Draft Report does not substitute for any statute or regulation, nor is it a regulation itself. The document assesses five primary cruise ship wastestreams, specifically, sewage, graywater, bilge water, solid waste, and hazardous waste. For each wastestream, the Draft Report discusses: the nature and volume of the wastestream generated; existing federal regulations applicable to the wastestream; environmental management, including treatment, of the wastestream; potential adverse environmental impacts of the wastestream; and actions by the federal government to address the wastestream. The Draft Report includes a discussion the existing federal regulations application to each wastestream to illuminate the Agency's current thinking and, among other things, invites public comment. As a draft upon which EPA invites comment, the discussion of existing regulations does not represent the consummation of the Agency's decision-making on the matters discussed. By its terms, the Draft Report itself does not impose binding requirements on any party. The regulations themselves, not the Draft Report, govern parties' legal obligations.

TABLE OF CONTENTS

Section 1: Introduction

1.1 Overview	1-1
1.2 Other EPA Cruise Ship Efforts	1-2
1.3 Cruise Ship Industry Efforts to Reduce Potential Environmental Impacts	1-4
References	1-6

Section 2: Sewage

2.1 What is sewage from vessels and how much is generated on cruise ships?	2-1
2.2 What laws apply to sewage from cruise ships?	2-2
2.3 How do cruise ships treat sewage?	2-6
2.4 What are the potential environmental impacts associated with sewage from cruise ships?	2-22
2.5 What actions is the federal government taking to address sewage from cruise ships?	2-39
References	2-41

Section 3: Graywater

3.1 What is graywater and how much is generated on cruise ships?	3-1
3.2 What laws apply to graywater from cruise ships?	3-3
3.3 Characterization of untreated graywater.....	3-4
3.4 What are the potential environmental impacts associated with untreated graywater from cruise ships?	3-19
3.5 What action is the federal government taking to address graywater waste streams from cruise ships?	3-30
References	3-31

Section 4: Oily Bilge Water

4.1 What is bilge water and how much is generated on cruise ships?	4-1
4.2 What laws apply to bilge water from cruise ships?	4-2
4.3 How do cruise ships manage bilge water?	4-6
4.4 What are the potential environmental impacts associated with inadequately treated bilge water from cruise ships?	4-8
4.5 What action is the federal government taking to address bilge water from cruise ships?	4-9
References	4-11

Section 5: Solid Waste

5.1 What is solid waste and how much is generated on cruise ships?	5-1
5.2 What laws apply to solid waste from cruise ships?	5-3
5.3 How do cruise ships manage solid waste?	5-7
5.4 What are the potential environmental impacts associated with solid waste from cruise ships?	5-9
5.5 What action is the federal government taking to address solid waste from cruise ships?	5-10

References	5-12
------------------	------

Section 6: Hazardous Waste

6.1 What is hazardous waste and how much is generated on cruise ships?	6-1
6.2 What laws apply to hazardous waste on cruise ships?	6-3
6.3 How do cruise ships manage hazardous waste?	6-7
6.4 What are the potential environmental impacts associated with hazardous waste from cruise ships?	6-9
6.5 What action is the federal government taking to address hazardous waste from cruise ships?	6-10
References	6-11
